RAMPS

Children love rolling things down ramps! Ramp play gives them the chance to explore mathematical ideas while building their problem-solving skills. You only need simple materials to create ramps and supports. Experimenting with different objects to see how they travel down the ramps is so much fun, too!

RAMPS AND CHUTES LARGE SET

A large collection of wooden ramps, planks, bamboo chutes, gutters and stands of various heights, plus crates for adding even more height. **MFW5710** £699.99

Explore slopes & angles Offering ramps of different lengths and a variety of supports encourages children to engage in mathematical discussions and deepen their mathematical thinking during play.

Explore distance & speed Offering a broad range of materials and objects supports children in making observations, comparisons and predictions. Ask 'What do you think will happen if you use this as a ramp?'

RAMP SET

A collection of different ramps and planks with 4 hollow blocks to build up height. **MFW5711**

£229.99

RAMPS 4pk

4 wooden ramps with sides. L80 x W12cm. **MFW5709**

£23.99

RAMPS RESOURCES SET

A mixed collection of items perfect for sending down chutes and ramps. See our website for full contents and details. **MFW5716**

£49.99
