

# Result Clothing Care and Size Guide

## Fabric Information

Result clothing is 100% waterproof and windproof.

Their clothing is made from a lightweight fabric that has a coated backing and is fully waterproof to at least 2000mm.

## Washing and Care Guide

**PLEASE REMEMBER** to refer to the care labels for each specific garment and carefully follow instructions. The way you clean your waterproofs can make the difference from them lasting a few weeks to lasting a few years.

Every time you wash any outdoor clothing it reduces its waterproof ability. If you can, try not to wash waterproofs in the washing machine. Leave them muddy and brush the mud off when it dries or use the bucket cleaning technique - see below.

Fill a bucket with cool water. **DO NOT ADD ANY DETERGENT.** Before washing the garment, brush off any loose mud or dirt. Close zips, velcro fastenings and flaps on jackets and trousers. Put the waterproofs into the bucket and slosh around. Two buckets may be necessary if they are particularly dirty. Hang up to dry in a position that allows air movement.

Result clothing is machine washable, however you need to refer to the care label for each individual item of clothing. Please be aware that even if you follow the care instructions carefully, washing waterproof clothing in the washing machine will reduce their waterproof lifespan. If you are washing in a machine make sure the detergent compartment of your washing machine is clean of any detergent or softener. If you run a hot wash program whilst the machine is empty, prior to washing the waterproofs, it will help clear detergent or softener residue.

**DETERGENT** - Waterproof clothing should never be washed using ordinary detergent or fabric softener. The chemicals in detergent can break down the composition of the fibres with each wash and strip the fabric of its waterproof coating.

**Remember to always check the label of your garment for exact care details.**

After washing the garment hang up to air dry. **IF** garment care instructions allow tumble dry do this on a low heat for a few minutes to restore the Teflon proofing. Make sure all waterproofs are completely dry before storing away, to avoid them becoming moldy or musty. Avoid storing in direct sunlight.

If you notice that the fabric of your jacket or trousers is absorbing rather than repelling water you may also need to re-waterproof your garment.
